INTRODUCTION

I am a registered and medical doctor offering 30 years of practice and service in the field of Cardio Vascular Care, specializing in Rehabilitation & Emergency Services inclusive of Procedures, First Aid, Medications and immediate Trauma Care. I have had a very successful and prosperous career so far. This is by virtue and nature of the many medical institutions I have had the privilege of being associated with globally. I am currently associated with **Ministry of Health Saudi Arabia** in Al Sairah General Hospital as the Resident Emergency Doctor since 2011.

RECOGNIZED FOR

- Providing patients with safe and evidence-based conscious sedation, I have had years of experience delivering safe and appropriate pre-procedural medications for patients.
- Mentoring, Training and Guiding Junior Doctors in clinical & departmental administrative work.
- Facilitating seminars and conferences from time to time to discuss further improvement and implementation of recent advances in the field of critical care, emergency medicine & Health care in general.
- Handling emergency care and rehabilitation for critical care patients, with vast experience in optimizing, managing and successfully handling pain management in patients who have coexisting morbid conditions like cardiac, pulmonary, endocrine, peripheral vascular diseases etc.
- Remaining as a thought leader and guiding the team while showcasing expertise managing serious conditions in the Emergency & Trauma Care Unit.
- Familiarity with the recent advances in the field of medicine.
- Pre and post - hospitalization assessment, discussion, friendly interaction, providing appropriate information and taking the needed consent of patients who are posted in the emergency.

CORPORATE HEALTH CARE & CSR ACTIVITIES

Ambuja Cements – Corporate Healthcare Specialist – 2003

As a corporate healthcare initiative, I was designated by Ambuja Cements to provide the needed health and medical care to their employees. During the course I was fully committed to providing the best medical care possible with a keen interest in identifying underlying health issues by assisting in early diagnosis and reference to respective specialist if the need arose.

Social Awareness Campaigns - The Center for Rural Development

I had served the rural areas by helping spread and gain awareness across the areas of HIV, detecting gynecological issues and helping in embracing general hygiene, cardiological issues and many more. During my course with The Center for Rural Development, I had helped many patients in acquiring the needed medical care using my well-established network of specialists. During this course, 5 Heart Surgeries | 7 Endocrinology Disability | 7 Plastic Surgeries were administered and quality medical care was extended to those under poverty line.
