PROFILE SUMMARY

12 years of exposure as Senior Technical Lead and Architect, designing innovative architectures to convert plans into actions by implementing the right tools and techniques. Consistently responsible for leading teams, managing programs, maintaining and administrating plans across the whole enterprise. Well acclaimed for delivering technological solutions for road blockades in the enterprise while aligning to the financial plans and ensuring business efficiency and growth.

Sample Photo

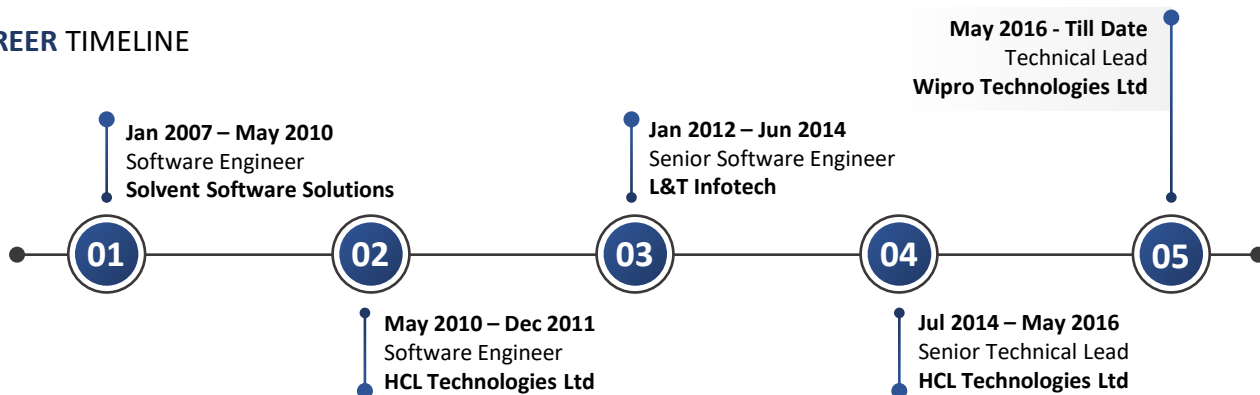

Working with one of the largest IT Companies of India, Wipro Technologies as a Technical Lead for the past 4 years, I have been recognized for delivering scalable architectural plans. Leverage all technical skills, effective coordination and negotiation between all stakeholders to develop and manage an effective working team to produce quality deliverables. Well-recognized for building high performing teams to implement the plans and ensure smooth functioning of the company.

Niche

- Possess critical Product Development experience and firsthand working knowledge of Architecture. Recognized for co-working with products team to convey important business needs and translate them into user stories to help the development team execute it.
- Great exposure in handling difficult projects and ensure timely deliveries.
- Building, leading and managing multiple Data Warehousing teams (8-20 Resources) from both FPP and T & M Projects (Development and Support Projects).
- Leading defect triage as needed and work with project teams to resolve prioritized defect fixes.

CAREER TIMELINE

DOMAIN

- Banking
- Insurance
- Telecom
- Retail
- Oil & Gas

A DAY AT WORK

Lead

Furnished with the necessary skills and prolonged exposure leads to concrete architecture plan. Building, training and leading teams to incorporate the essential skills required to implement the plan and overcome road blockades.

Architect

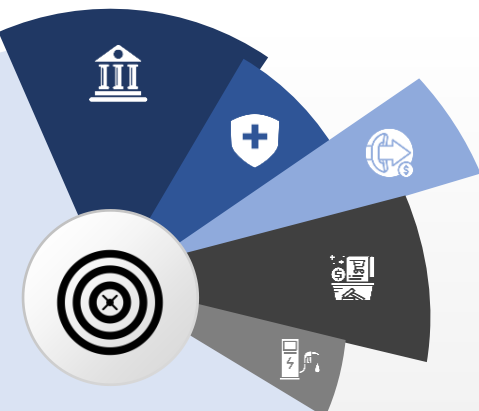

Design a plan to access probable demand and comprehend the current demand to bridge the gap between the two and chalk out a viable solution in the process.

Strategy

Strategize and synchronize all entities of the Enterprise Architecture (EA) Program to focus on guiding people, methods and organizational changes.

Delivery

Implementing outcomes to bring positive changes through constructive administration. This encompasses the right organizational layout, structure the team with the appropriate members to orchestrate enterprise architecture plans and execute them.

KEY SKILLS

Problem Solving

Innovative Architecture Plan

Designing Architecture

Team Building

Team Leading

Risk Management

Problem Identification

Effective Communication

Stakeholder Coordination

Time Management

Budget Management

EDUCATION

2003

BTech in Computer Science & Engineering
Nagarjuna University, Guntur, AP

2006

MS in Information Systems
Queensland University of
Technology, Brisbane, Australia

TECHNICAL SKILLS PORTFOLIO

Programming Languages

C/C++, HTML, SQL, Shell
Scripting, Base SAS, Adv SAS,
Python

Operating System

Windows XP, Unix

Tools /DB/Packages

Informatica Power center,
Datastage, Teradata, Oracle,
DB2, IBM Cognos BI Suite,
Squirrel, AQT, ultra-Edit, Putty,
Toad, Teradata SQL Assistant,
Google Cloud Platform

- Vast Experience in CICD Pipeline and implemented the same in the current projects to align with DEVOPS requirements
- Proficient at handling business users at onsite in UAT Phase in fixing the defects on priority basis.
- Advanced working knowledge in SAS, Base SAS & Advanced SAS 8x, SAP Business Objects XI 3.1 and IBM Cognos 8x Report Studio/Query Studio including Framework manager modeling.
- Vast work experience in Data modeling (Star and Snowflake Schema), Conceptual, Logical, and Physical business models using Erwin Tool.

SIGNIFICANT CONTRIBUTIONS

- Spearheading teams to develop the architecture and design plans according to client requirements.
- Analyzing IT industry market trends to determine the impact on the architecture.
- Identifying useful resources and necessary changes to make the most viable architecture plan.
- Working on every step of implementing the architecture and using all necessary technical tools in the process to bring out the best deliverable plan.
- Identifying defects in the plan to stay ahead of failures.
- Succeeding in expanding Parallel Jobs, Sequence Jobs, and Container jobs using DataStage.
- Initiating file transmissions between servers using UNIX Shell Scripts using Born and Korn script commands.
- Handling database tuning, ETL Tuning, trouble shooting, and performance monitoring activities.
- Delivering required methodologies for all phases of the system development and implementation process including analysis, design, development, testing and ongoing support for the client area's application systems in an environment of diverse development platforms.

PROJECTS ANNEXURE

HSBC (Banking - UK) | Role - Project Lead | Project Firefly

Aims to migrate John-Lewis cards and loan portfolios from legacy worldwide HSBC installment and retail lending system (WHIRL) and its supporting systems to new replacement system. Initial phase JL credit card will be migrated from WHIRL2.0 gold suit to latest Europe Middle East Africa (EMEA) and then later adding to loan portfolios.

USAA (Insurance & Bank - USA) | Role - Technical Manager | ETL Factory

The overall objective of this program is to adhere to USAA's Architectural Guidelines that emphasizes on utilization of foundation layer rather than Netezza for warehousing purposes. The overall scope is to offload Bank's each product data into foundation layer (Hadoop) and implementation of E3 framework for data offload and ETL factory.

USAA (Insurance & Bank - USA) | Role - Technical Manager | IMSM

This project is mainly intended to provide Customer and Product data to marketing teams for effective Marketing campaigns. This is intended to make Unica as their only primary Marketing tool to replace all other systems (Individual Marketing Tools) by integrating all the marketing data in to one (UNICA).

USAA (Insurance & Bank - USA) | Role - Technical Manager | VOM

Voice Of Member A.K.A Member Feedback Analytical System. This project deals with the analysis of member's feedback of the organization and presenting them to the High Level Managers for analyzing the business trends.

AIG (Insurance - USA) | Role - Technical Lead | ALIP

The ALIP (Accenture Life Insurance Platform) system has been selected as the platform from which all active blocks of business will be hosted. All legacy Life Insurance application processing systems like AGL Vantage system would be demised so that ALIP can be a single source.

Chevron (Oil & Gas) | Role - Onsite Lead | 1Store to BPC Integration

Whilst Planning, Budgeting and Forecasting has always been a critical process within the Chevron ABU (Australasian Business Unit), the implication of larger projects entering into operational phases means there is an even higher emphasis on ensuring accurate and timely forecasting information is available for key decision makers and SAP's BPC was the choice for the same.

Chevron (Oil & Gas) | Role - Onsite Lead | HESore

HESore is a Business Intelligence solution for Operational Excellence, Health, Environment and Safety within the Chevron ABU (Australasian Business Unit) which comprises of integrating data into the ABU data warehouse and utilizing a reporting front end to present the data.

Marsh & McLennon (Corporate Insurance) | Role - Onsite Lead | MDW

The Marketing data Warehouse (MDW) is a central member repository that contains detailed information of customers for supporting all marketing initiatives. The Data Ware house stores information pertaining to - Marsh Affinity Client membership / employees information, Marsh Affinity client administration insured information, third party data provides additional demographic information.
